# Knowledge Organiser: Light

Careers connected to light: optometrist, optic scientists, lighting engineer

### Lesson Sequence

1. Identify the difference between light sources and non-light sources

2. Explore the light that comes from the sun and how to stay safe

3. Explore materials which are reflective

4. Discover how shadows are formed

5. Investigate how shadows change throughout the day

6. Investigate how you can change the size of a shadow

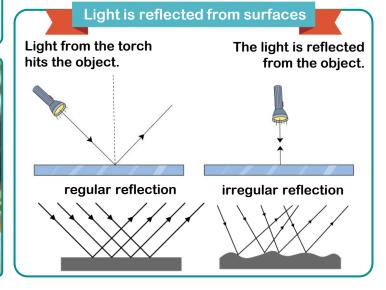

### Size of a shadow changes

A shadow is caused when light is blocked by an opaque object. A shadow is larger when an object is closer to the light source. This is because it blocks more of the light. opaque object umbra screen source umbra opaque object screen

### Key Facts

We need light to be able to see things. Light travels in a **straight line**. When light hits an object, it is reflected (**bounces off**). If the reflected light hits our eyes, we can see the object. Some surfaces and materials reflect light well. Other materials do not reflect light well. **Reflective surfaces** and materials can be very useful. Remember the **Sun** can be dangerous. Mirrors reflect light very well, so they create a clear image. An image in a mirror appears to be reversed. For example, if you look in a mirror and raise your right hand, the mirror image appears to raise its left hand.

## **Before and After Test**

| How does light travel? | before | after |
|------------------------|--------|-------|
| In a straight line     |        |       |
| In a curvy line        |        |       |
| Light is everywhere    |        |       |
| Light does not travel  |        |       |

92

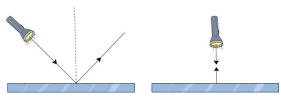

\*

| Dark means?  | before | after |
|--|--------|-------|
| When there is a little bit of light so you can see |        |       |
| The absence of light                               |        |       |
| You must eat carrots so<br>you can see             |        |       |
| The switch is turned off                           |        |       |

| When light bounces off a surface, it is? | before | after |
|--|--------|-------|
| absorbed                                 |        |       |
| dissolved                                |        |       |
| reflected                                |        |       |
| bounced                                  |        |       |

| Sources of light include                    | before | after |
|---|--------|-------|
| the sun                                     |        |       |
| the moon                                    |        |       |
| street lights                               |        |       |
| torches                                     |        |       |
| Looking directly at the Sun is?             | before | after |
| dangerous                                   |        |       |
| safe  |        |       |
| ok if there are clouds                      |        |       |
| ok if the sun is rising or<br>setting       |        |       |
| What is the correct meaning of translucent? | before | after |
| semi-transparent                            |        |       |
| opaque                                      |        |       |
| transparent                                 |        |       |
| solid                                       |        |       |

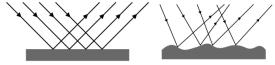

If you were to pay a visit to a funfair, which diagram shows a reflective surface which is likely to distort your reflection?

# Rocket Words

| light            | a form of energy that allows our eyes to see                              |
|------------------|---|
| reflect          | the process that describes light bouncing off a surface                   |
| vitamin D        | a vitamin that come from sunlight or food and important for bone strength |
| ultraviolet rays | type of light that can be harmful   |
| fluorescent      | gives a highly visible reflection of light                                |
| high visibility  | can be seen easily  |
| shadow           | a dark image that is formed when an object blocks the light               |
| ray              | a thin beam of light  |
| cast             | to throw or project   |
| position         | where something is placed   |
| shape            | the outline of something  |
| puppet           | a doll that looks like a person or an animal                              |
